WELCOME TO MERRIGNEE MERINO STUD'S 35th ANNUAL UNHOUSED RAM SALE

On behalf of Merrignee Merino and Poll Merino Stud, we welcome you to our 35th annual on-property **unhoused** ram sale of superfine, fine, and fine/medium wool types.

The 10 August/September 2023 drop (Lots 1 to 10) and 80 August/September 2024 drop rams in this year's sale catalogue will be available for inspection from 10am, with the auction to commence at 1pm.

The 12 month old, 2024 drop rams to be offered at this auction, and through flock rams sales commencing in mid-October, have been **reared in the paddock, not shedded**, and are in good working order.

To assist with your selections, the 10 2023 drop sale rams were tested by A.W.T.A. in **June 2024**, while the 80 2024 drop sale rams were **mid-side sampled** in the **first week of August 2025** and fleece tested by Riverina Wool Testers. The 2024 sale ram averages are 17.3 micron, 2.8 SD, 16.4 CV, 16.3 SpinF and 99.6% CF.

The 2024 drop sale rams were **shorn on 22nd April 2025** for their greasy fleece weight percentage. Current **body weights** will be done the week of the preview and will be displayed above each ram on sale day, along with their fleece tests and sire/family information.

On sale day, the Merrignee 2024 drop **paddock raised** rams will be **12 to 13 months old** and will have **5.5 months wool** on them.

Jono, Anna, Digby, Toby and Zoe, along with Charlie and Pip, invite you to join us at Little Range. A light lunch will be provided, along with a BBQ after the sale.

CLASSING SERVICES

Jono and Charlie welcome the opportunity to **VISIT YOUR FARM** to discuss your Merino flock, understand your sheep and business aims as well as the topography and climate of your property.

PLEASE NOTE: All 12 month old rams offered at the 2025 Merrignee Ram Sale are paddock reared, NOT shedded. All rams are Aug/Sept 2024 drop and have only been **shorn once** in April 2025, therefore their fleece weights are only done as a guide as the age of these rams could vary by up to six to eight weeks from the earliest AI lamb born to the last paddock joined lamb born. This is the same with the ram body weights – they are weighed the week of the sale, but are only a guide due to the rams spread of their date of birth in 2024.

On sale day, there will be individual current information for each ram, including micron, SD, CV, comfort factor, spinning fineness, GFW%, sire/family and body weights. This information is also included in this catalogue.

Fleece micron, SD, CV, comfort factor and spinning fineness measurements are independent of the seller. They are done on **side samples taken from all the 12 month old rams in the first week of August 2025** and tested by **Riverina Wool Testers**. Such information is provided as a guide only and the seller accepts no responsibility for the accuracy nor the repeatability of the information supplied in this catalogue or on the individual display cards above each ram on sale day.

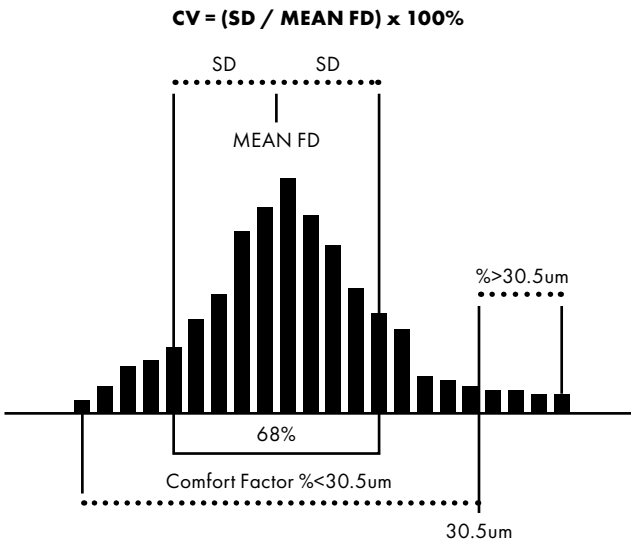

FLEECE TESTING DEFINITIONS

FD – Fibre Diameter: The mean (average) micron result of a sample.

SD – Standard Deviation: Measures in microns the spread of fibres either side of the mean FD in which 68% (two-thirds) of the fibres lie. The lower the SD the more uniform the wool.

CV – Coefficient of Variation: The CV is the SD divided by the mean FD x 100. CV measures the FD variability as a percentage. CV tends to fall in the range of 15% to 30% – 15% is a very uniform wool, while 30% is a highly variable wool.

CF – Comfort Factor: Measures the percentage of fibres below 30.5 microns. Calculated as 100 minus % of fibres below 30.5um.

SpinF – Spinning Fineness: Calculated using mean FD and CV to determine an ‘effective’ fineness. This figure gives a measure of spinning performance for wools of any particular micron the spinning performance decreases as the CV increases.

Ram sale measurements comply with the standards recommended by NSW Stud Merino Breeders Association.
